Name: _____James Garrison_____

The purpose of this questionnaire is to assess students' background on the topic so it may be applied to the level and scope of the lecture for the semester.

1.   List three things that you consider important in software engineering, i.e., what are the things that you want to get out of this class?

 Requirements Engineering
Continuous Integration/Deployment
 Unit Testing

2.   Software development experience in terms of the type of project, your role in the project, and development environment such as database, IDE, etc .

Mostly class projects both as an individual contributor and as a lead.
VS Code, NetBeans, PyCharm, Vim

3.   Programming languages used: list the languages that you are familiar with along with the competency level (1 -5, 5 being the best)
            Java 3
            Python 4
            C 3

4. Would like to be considered as a team lead for the term project? If selected, you will be in charge of project management plus your role in the development.

        - Yes (why?):

        - No (why?): I will be working full time this semester and would prefer to focus on my role in the development of the project
